## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3 are, drawn to a method of detecting the presence or absence of a prokaryotic microorganism, classified in class 436, subclass 1.
  - II. Claim 4 is, drawn to a method of detecting plurality of pathogenic microorganisms in a sample, classified in class 435, subclass 4.
  - III. Claim 5 is, drawn to a method of using broad spectrum fluorescent label, classified in class 436, subclass 546.
  - IV. Claims 6-7 are, drawn to a device for capturing and releasing bacteria, classified in class 435, subclass 308.1.
  - V. Claim 8 is drawn to a sensor, classified in class 435, subclass 317.1.
  - VI. Claim 9 is drawn to a method of using a protein, classified in class 435, subclass 69.1

The inventions are distinct, each from the other because of the following reasons:

Groups I-III and VI are drawn to different methods. The inventions are shown to be distinct because they are drawn to distinct methods, which differ in method objectives, method steps and material used.

Groups IV and V are drawn to two different specifically, technically and mechanically distinct products.

Inventions II and V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced

Art Unit: 1645

by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case detecting plurality of pathogenic microorganisms in a sample can be done using routine and standard culture media and biochemicals.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and also requires independent searches restriction for examination purposes as indicated is proper.

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
